

It's All About Energy!

This one is going to be somewhat challenging to some, but I feel I must put it out anyway!

In these moments of now, there is much to share regarding the truth about the place we call Earth. Imagine some beings who are struggling to survive with no real way of creating energy for themselves. What could they do? Why can't they generate their own energy? Where did they come from? And why should you imagine them or this scenario? Well, you certainly don't have to, but I have some idea as to what has been going on, what IS going on, and what WILL be able to happen to clear up what looks like the most impossible mess!

OK, here is the story I have for you.

The bodies these beings are in, were "accidentally" created so they are far from perfect. It seems that they were some sort of prototype that was supposed to be destroyed, but by some error, were not. They are semi created bodies - not complete - they are mostly technological and only partially biological. A group of opportunist beings found these bodies and entered them. They have no souls, but they have some extraordinary creative abilities, using certain types of technology. They find that they do not easily exist in this Universe, yet they have to stay here, or cease to exist, because ultimately, they are finite simply because they cannot create their own energy. They want to live on Earth, but they struggle to live in its atmosphere. So, what could they do?

Meanwhile, those of us infinite beings who answered a call from the Universe Creator to come and co-create, and who were able to enter human bodies which it created as fractals of the Universe, came to play in this amazing new creation, entered this Universe and arrived on Earth. We entered as humane human beings and started to co-create with what we found on this incredibly beautiful planet sharing with the flora, fauna and mineral kingdoms, all living together in perfect inflowment. It was all going beautifully as we in human bodies enjoyed learning about what we found on this incredible planetary body and how we could use what was there, to create more beautiful creations. Living this way kept us vital, strong and extremely healthy in our perfectly constructed biological bodies. Our source of energy was energy from the earth's surface through our bare feet, sunlight from the sun into our eyes and onto our skin, pure oxygen from the air, and pure water from the land. Interacting graciously with the flora and fauna was really enjoyable, and we lived in harmony and balance with all around us. We had the ability to communicate with one another using our heart connections -

whether we were physically far apart, or close by. We could also transport our physical bodies to anywhere on the earth's planetary body by intention and then allowing it to happen by our own choice.

While this was all going on, the other beings, which for now, I will call the *suchons*, were struggling to survive because they had no way of creating their own energy after what they had to start with in those bodies, and it was running out! They were located on Saturn and the Moon and were hanging out there, but, as mentioned above, they found that they struggled to exist in this Universe and certainly could not exist on Earth in their current state. Their idea was to feed off humans' energy. The human has an endless supply of energy, and in contrast to the *suchons*, the spirits who can enter human bodies are infinite, i.e. they always have been and always will be existing.

However, on a perfect Planet Earth, where humans know exactly who and what they are, it would be impossible to attach any "extraction tubes"! Humans that are grounded, know who they are, what they are doing on Earth, where they came from and why. They are aware of everything going on around them, and they remember EVERYTHING. With Humans in this full awareness, it would not be possible to feed off of them.

So, how could the *suchons* obtain the energy from the humans? These desperate beings put into action a very clever plan. First they created an *Overlay* over the beautiful Earth. This *Overlay* actually is brilliant technology. It mimics Earth, but it is NOT Earth. It is, as the name implies - an overlay - it is sort of like a mask. It is synthetic, and it projects a very close copy of what is on earth through this *Overlay* onto its surface. Beneath this *Overlay*, is the Organic Planetary body of Earth, the feminine aspect and expression of Universe Creator. These *suchons* created portals from Organic Earth onto the *Overlay*. They also created amnesiac programs which they used as they sucked humans from Earth through the portals onto the *Overlay*. As humans arrived on the *Overlay*, they forgot where they had come from, who they were, and what they were doing where they were, which by now, is on the synthetic earth *Overlay*. For a while, it sort of felt like earth but they had a certain amount of knowing that something was wrong, and an awareness of their inherent technology, and spent some time trying to work out why it didn't feel right where they were. They built pyramids as energy centers in an attempt to propel themselves back to where they were supposed to be, even though they couldn't fully remember where that was. But as they did this, the *suchons* attached their technologies that extracted energy from the humans, and even managing to use some of the energy generated by the pyramids. Once the extraction tubes were attached (not discernible to the humans), any amount of inner power and inherent technology was lost for the humans. In time, they no longer could sustain

themselves by earth, sun, oxygen and water, and they started having to consume from the flora and fauna kingdoms in order to sustain their physical bodies which was not how the human vessel was first designed. However, it was designed with resilience as an important component, so it was able to adapt and to convert the consumed materials into energy - which unknown to the humans, was in large part being sucked right out of them. Next, the suchons created "The Loop".

The Loop.

The Loop is, as the name implies, a loop. This loop keeps the abducted beings in a loop of birth, life, death, karma, birth, life, death, karma, all the while, having energy sucked off of them. It has several dimensions. The energy that was the strongest for the suchons to suck off was stress, fear, and lack and limitation. Therefore, over the centuries, the suchons found many ways to get the humans under control, into fear and stress and to have them believe in lack and limitation. And in the reincarnation loop the humans stayed. And around and around they went.

Fakod of the Suchons

The leader of the suchons called itself GOD, (I'm going to call it "fakod"! - ***Fakod of the Suchinions!*** ;) and it claimed to have created the Universe. SOON, it managed to convince the humans that it was their ruler and that they had to acquiesce to its demands and rules. It did this by creating religion and by programming the humans. To be able to do all of this, it needed some of its own minions closer, i.e. on the *Overlay*. As mentioned before, the suchons could not exist in the atmosphere of the earth, or on its *Overlay*. They had to think of a way to be able to get some of them onto the *Overlay*. Next came another very clever plan - to adjust the bodies that they had started squatting in, to look like a human body - it was quite the creation, and once these bodies were suitably adapted, they could act like humans - with one very important difference - they needed something to sustain them and energize these bodies, which meant to feed them some powerful fuel. They found that eating real human fetuses and young children and drinking their blood would sustain these fake human bodies so that they could live on the *Overlay* without looking out of place. This was great progress for them because now, they could manipulate life on earth so much more.

Soon, with its massive ego, confident it could really start to get everything it wanted, *Fakod* put its minions onto the *Overlay* in these fake bodies and called them priests. These so-called priests were given the job to create the above mentioned religion. Religion was a "**god-send**"!!! With first hundreds, then thousands and then millions and millions worshipping and praising this *Fakod*, feeding the suchons became easier. Once they got the humans sucked into believing in this false ruler (*Fakod*), they managed to program them so that even the humans wanted to become priests and to preach "the

word of "God" to the others. The suchon priests even had these humans help create a book that was supposedly the book of god and the law of god, and many by now, were in the market to *buy bull* and believed this entire story. This was a great help to the suchons energy sucking programs - praise and worship was the perfect energy for Fakod and his minions.

Soon, more and more of these beings wanted to go to earth to enjoy what those in bodies there could experience, including becoming the important and elite, taking over the land, making laws and rules and creating those important roles for themselves so they could control the humans more and more. They needed extra feeding to prepare for their time on earth, and to get used to their new body adaptations. They found that they could exist on Saturn and on the Moon, and get fed from the human energy that was sucked constantly from them, but when they prepared to go onto earth, they needed more and more energy. Meanwhile, the humans had to adapt. As mentioned above, when they were on the genuine organic earth, they did not need to eat - they didn't consume anything. Soon, the humans learned to make all sorts of fake foods so they could get it faster because at this point, they were experiencing hunger - these fake foods were processed and really not very good for them, but they needed something more to help create more and more energy, not knowing how much was being sucked off them. Some of them got sick and even died. But no problem to the suchons, the beings just got recycled and came back in a brand new human body to go around the cycle again. But I digress . . .

To keep up enough supply of energy for all the suchons in the Universe, they programmed the humans to procreate more and more so that they could birth them onto the *Overlay*, so that they could milk and harvest their energy. The more human energy they were able to harvest and use, the more dastardly plans and deeds they were able to put into action. They even were acquiring certain percentages of the human's inner technologies which they used against the humans. Bigger and bigger plans came - keep programming the humans to praise Fakod, threaten them with all sorts of terrible punishment if they don't and this way, keep them in fear which fed the suchons even more. Create separation - divide the humans with all sorts of differences to keep them confused, and at war with one another - then convince them that war must take place etc, etc, etc . . .

One of the main things they worked on was to keep the humans only semi-healthy. They knew that if they allowed them to be fully healthy, that they could regain some of their inner technology, and even remember who they were, so it was vital to keep them in a state where they were well enough to create energy, but not well enough to remember who they were, hence the huge operation which created the sick-care system that they called the health-care system.

Some of the things that occurred as time went on include, (but there are many, many more):

1. Created the Overlay.
2. Used up all the energy they had doing that and finding that they could live for a while on Saturn and the Moon.
3. Used the portals they had created in the Overlay to suck humans off Organic true earth onto the Overlay.
4. Dropped most of them on Africa which was at that time reflecting the true earth's fauna and flora and where these humans could survive fairly easily, and reproduce.
5. Started sucking energy from these humans via their clever tubes that could extract the energy.
6. Found that fear, stress and the feeling of lack and limitation energy coming from humans was what fed them the best and that they could assimilate. The creative and joyous energy coming from humans was almost poison to them.
7. Saw that even better energy for Fakod was praise and worship.
8. Found the need to program the humans, so that they would create within themselves what was needed to create the energy the suchons needed.
9. Turned Saturn and the Moon into transmitting centers.
10. Added to "The Loop": On the way in, an overlay of the chakra body was attached to the human body to receive the programming from Saturn and the Moon.
11. Achieved the ability to transmit programs to humans, including the program to believe there is a greater power that they cannot see, but is their GOD (Fakod) who they have to praise.
12. Made the technology to adjust their current bodies into fake human bodies and sent them in onto the Overlay to animate the programs - put them in as priests and created religion. All the different religions came as time went by.
13. Through the priests, they made Law, which was totally different to Natural Lore and which were really codes and statutes to control the humans. This made the humans into slaves, with more and more energy milked from them.
14. Created divide and conquer with different religions and other separation tactics.
15. Sent in more suchons to be the Kings/Queens and leaders. (Sometimes known as "Elites").
16. Made Kingdoms and Countries.
17. Made borders and eventually more control of travel.
18. Made war - made the humans believe that war is inevitable.
19. Made money.
20. Made banking and Banksters.
21. Lifted the humans off the land, separated them from anything resembling natural ways of

life.

22. *Suppressed natural healing methods.*

23. *Suppressed clean energy production.*

24. *Programmed population with more lack and limitation propaganda.*

25 *Imprisoned anyone who questioned the lies and distortion.*

26 *Murdered anyone who learned any truth of suppression etc.*

Many, many distractions were created too - as the centuries went on, there were more and more clever manipulations such as sports which kept millions of humans distracted. In addition, there was much esoteric intrigue put out to keep the masses distracted and confused - sometimes the humans heard about possible life "out there" and mostly, the controlling system would deny it as stories and such. There also started a fringe community whereby many started to see things that did not correlate with what they had been told, so they started to research. Sometimes this was good, but then the suchons would throw in something to get them really distracted and then to cause yet another rift so that humans would be arguing amongst themselves when the best thing to do would have been to unite. Some of the things that the humans researched had value and some became awoken because of this - and they had the wisdom to stay out of argument and listened to their hearts to be discerning as to what was true, and what was just distortion of truth. Much of this was created to keep the energy for the suchons and so that the humans wouldn't be able to use their own energy in good ways - for being creative and for having fun - which, little did they know, would have been so much better for them and so much worse for the suchons.

The other thing that happened to these abducted humans was that they started to age. The toxins entering their bodies via first, the "food", then by intentional poisoning by their captors, to keep them dumbed down - enough that they wouldn't start thinking for themselves, but not so much that they wouldn't keep supplying the suchons with all the energy they needed to survive. Although they could not create their own energy, they sure were good at manipulating others to create it for them, and over centuries, they had this system made that provided them with as much energy as they wanted. It was perfect - for them! But the humans were suffering. Children went missing every day, and somewhere more and more were being sacrificed, abused and consumed. The *Overlay* on Earth became a battered mess, with waste everywhere, reflecting this vile consuming way, and all life began consuming other life to sustain their bodies to stay alive. Those having their energy sucked out of them daily, had to consume other energy just to sustain their own life. It became a vicious cycle. No one suspected there was anything REALLY wrong, they just started to believe that their souls just needed "testing" and "lessons for growth" etc.

Still Looping

The system known as Karma came into being as they kept going around "The Loop" from all of the experiences the humans had during incarnations and they carried this Karma around with them in the cycles until they could balance it all out. The humans were stuck in this ongoing, never-ending cycle of reincarnation, so that the suchons could keep feeding off them. They started to simply accept that a life of hardship was normal, with sayings such as "life's a bitch, and then you die"! Meanwhile, the suchons continued to create ways they could manipulate more and more energy out of the humans. It was getting worse and worse. The Overlay was getting to be more and more of a mess. Pollution, destruction and death - death that kept on cycling around and often after painful dis-ease experienced by the now not authentic human body. Instead of being able to live in the human vessel as long as the being would choose, age and disease took them through the death, karma, reincarnation/birth and life cycle. Not only were the humans taken off the TRUE ORGANIC PLANETARY BODY OF EARTH, they were also taken off the land of the Overlay by the clever manipulations of the suchons whereby the humans were largely living in cities. They lost all memory of who they were, they forgot how powerful they are, how they have advanced inner organic technology that is in complete synchronization with the organic earth, and that they did not have to get sick and heal, that they could normally, when on the organic earth's surface, live as long as they chose. There were, however, some humans who had done some of the research into things that didn't make sense and were pretty much opposite to what they were told by the system. These awake ones could tell that they were jointly responsible for what was occurring - self responsible for their own experiences and once they started to see more and more of what was happening, they recognized that they had co-created what was going on by being ignorant and by allowing and accepting all of this. They also started to see "The Loop" for what it really was and realized that they really needed to clean up their Karma - because they knew that the time was coming when they would have to really do something to make changes. They knew that things could not continue as they were . . .

These awakening beings actually were volunteer evolved souls who had been asked by Universe Creator to go in and expose to the rest of the Universe what was occurring within the *Overlay* on earth. Their mission was to go there and together stop the suchon's game. Even these volunteer evolved souls (to various levels) had been hit by the infection/virus causing them not to have full memory of who and what they were and of their mission. They each found their awareness (some with the help of the flora kingdom), at various stages, of their time within the *Overlay*. Having come from all over the Universe, they were very wise souls and even though it took some time, eventually, they started to remember what they were doing on the *Overlay*, what it really was, and what they had to do about it.

Massive Deceit

There was so much deceit at this point that the vast majority of the fed-upon humans were oblivious to what was happening. Even seeing high numbers of their fellow humans in poverty, more and more restrictions on what they were 'allowed' to do, false terrorism attacks blatantly executed, didn't make them aware of what was really going on. Instead, it created more fear and stress to feed the suckers - which was exactly what the suchons wanted. The population was still rising despite all of this, because that is what the suckers desired - more and more energy created for them!!! They started getting more and more greedy and loved using this delicious human energy to develop more methods to keep the humans enslaved and giving of their energy - between the ones on the *Overlay* in their fake bodies, and the ones on the Moon and Saturn - they simply couldn't get enough. All the while, children were being stolen and consumed - it was horrible.

It was all going so perfectly for them - until some of the "evolved souls" shook off more of the memory infection, and started working out and seeing all of the clever deceitful ways that had been created to feed off the humans. Once exposed, these deceitful ways had less power, because these who were seeing were able to let go of fear and stress, use their (remaining) creative abilities and express some higher vibrations, hence not feeding the suchons. But it wasn't enough to stop them until a much higher number of the evolved souls recognized the tricks. The evolved souls used their awareness to guide some of the humans within the *Overlay* to recognize what was really going on. The "rescue team" started to recognize what they had to do to clean up this mess and to put an end to this domination, control and outright theft, that had been imposed upon the organic earth, by the reckless creation of this *Overlay*, which at this point was massive **AND** a massive mess!

What they had to do was to awaken consciousness in the programmed, dumbed down humans. The only way to do this was to get them as close to living on the land as is possible on an *Overlay*. This meant acquiring use of what was left of areas on the *Overlay* that resembled natural earth - areas that were remote and still had reflected through the *Overlay* what was on natural earth such as forests full of trees, mountains, streams, areas where cultivating flora and fauna was possible. They needed to create shelters for the humans as well as places to grow food and keep animals - to get back in touch with the flora, fauna and mineral kingdoms - and to recognize that ultimately, they did not need to consume anything - but this was going to take some time. Another major thing they had to recognize was that the biggest sucking took place when they were connected by religion and by legal structures. They had to find a way to separate themselves from these structures. Once they had this figured out, this disallowed the suchons to impose their rules and codes upon these humans. This way, they could create

their new land-based communities in any way they chose - once they found a way to obtain the resources to do this.

Getting the first group of humans out of the cities was the first step. Teaching them to live in nature - at least what was left of anything resembling the pure nature that is on organic earth - was a great beginning. What they had to do was to start living in a way that was as close to living on natural earth as is possible on an *Overlay*. This way, they could create **portals** which would take them *in*. This is what is really meant by inner work and going within. They had to go within themselves to remember who they really were, AND to go in - beneath the *Overlay*, back onto organic earth. Some humans have seen and felt this as a hollow earth - something under what they were currently living on. Their perception was close. As the humans who came to create these communities that were as close to nature as possible spent longer living there, and were able to separate themselves from the religion and the legal attachments, they were able to sustain themselves without anything to do with the system that the suchons had created. Soon, these humans were able to become very creative and really start to enjoy themselves - living in these environments such as in a forest, or on open plains or mountains. This was getting them closer and closer to their natural ways of being - some started to remember their inner technology and even began to use it. This caused the *Overlay* construction under them to get thinner and thinner - so that as mentioned before, **portals** started to open up. Living this natural way would cause them to slide through the portals right back onto natural earth. They would awaken and realize that they had slipped through and were now on the true, natural earth.

Once the "rescue team" started to recognize that this was occurring, some of them were able to either return through the portals, or stay on the *Overlay* so as to guide all of the other awakening humans to come and live in the communities and to go through their *re-naturalizing* process so that they too could slide back through onto natural organic earth. More and more communities were created all over the *Overlay* - including by and in the oceans so that our brothers and sisters of the oceans could also slip through. The more humans and animals that went through this process, the more others found themselves awakening to what was going on, and the more of them who went through the process. It was possible to keep using the communities and allow the humans to go through their own processes.

Eventually, as many as chose to take this path did - until such time that Universe Creator knew that all it had to do was to dissolve the *Overlay*. Now that her humanity was not stuck there, no longer held hostage, she could uncreate this monstrosity and dissolve it into her Universal body and transmute it - until it was no more. Finally, her humanity was back where it was meant to be.

And the suchons? The energy ran out, so they took themselves back out of those bodies and out of the Universe, and with that, dissolved because remember, they would cease to exist out of the Universe, and the "accident" and mistake, was over and all back to how it was meant to be.

This is quite some story isn't it? Imaginary? Well, in these moments of now, the end is, but it is an awareness of mine that the rest is very close to a true story. It explains so many otherwise unanswered questions. What is a more likely story? Share yours in the comments if you would like!
